

# BOOTCAM

78th of Sweden has taken a camera which has been on the market for seventeen years and revamped it. Most components are simple and very durable and has been kept because we know they can stand the test of time. Our challenge when designing BOOTCAM was to keep as much as possible of the simplicity and quality of the

old camera while making the BOOTCAM modern and integrated with today's pipe inspection equipment.

BOOTCAM is compatible with WinCan ProTouch using a tablet on site uploading reports directly to your customers.
