

# PRODUCT SHEET PUSH SPIDER

The Push Spider is a new multi camera system for pipes in dimensions 50 mm to 110 mm. It can handle 87 degree bends in dimension 50 mm. The camera head can rotate 355 degrees and has four camera modules for overview which can be quickly switched with the hand unit. This gives a more efficient search since you don't have to wait until the camera rotates

but can easily view to the right and then switch to the left to change the angle. Similarly, for a view upwards or straight forward. On the camera head there are four LED lights which can be used simultaneously or one at a time. The lights are controlled through simple buttons on the hand unit. This will allow you to use the camera in both dark and bright pipes.

## SPECIFIC DETAILS

- Camera head 30 mm diameter
- Weight of the camera 8,4 kg
- 8 inches monitor where you can follow the camera, take pictures or record.
- 30 meter push rod
- SD card
- The camera runs with batteries or power adapter
